Who is AI?

Who is? Where is? What is AI?

AI is riding a bike, taking the bus, walking rather than driving, driving in a carpool rather than riding alone, using the UNM shuttle, hopping on the Railrunner, using the FREE UNM bus pass all over and all the time, walking the wrong way up escalators, appearing to listen earnestly to the details of your best friend's Saturday night while contemplating the best time-trial on a hike 'n' bike to Sandia Peak, wondering with no small degree of cynicism whatever happened to the Segway, why feet are so often referred to as alternative transportation and would walking over hot coals result in a carbon footprint?

AI will shortly be moving into furnished accommodation in the SUB. AI's spiritual home however, is AI Ternative Transportation on Facebook. No appointment necessary, do drop by online and say hello. Though AI is notoriously hard to pin down, it seems a pattern is beginning to emerge: What is? Where is? Who is AI? Hmm, look very closely. It could be you.
