

To continue UNM's commitment to safety for all, UNM Parking & Transportation Services (UNM PATS) has amended the following guidelines and requirements for customers using the shuttle bus system, based off the Centers for Disease Control and Prevention's updated guidance:

- When waiting at a shuttle stop to board a bus, **please form a single-file line and practice social distancing** by remaining at least 6 feet apart.
- **You must have your mask or face covering on to board and ride a shuttle bus.** Mask must be fully covering your mouth and nose.
- On shuttle buses that are equipped with two passenger doors **entry will be through the front door** and **exit will be through the rear door.**
 - Using this loading and unloading practice will help to ensure passengers riding the bus will have to opportunity to obtain a mask that will be provided to be able to meet the mask or face covering requirement.
- Please be aware that if a shuttle passes a shuttle bus stop without stopping, the bus may be at its capacity limit with seated and standee passengers.
